

I was rather concerned in hearing that our no call list was in jeperdy. Mabe you enjoy being dissturbed by tellamarketers calling you while you are trying to eat your supper or watching that great tv program that you hope no one will bother you. Or maybe trying to get something done around the house. Well I don't, so keep the no call list here in Wisconsin as it is. Maybe you should adopt a simular program for other states. Thanks for letting me give my opinion.
